Quality
pays
for itself.

Greetings from the Management

Okamura Corporation was inaugurated in 1945 as Okamura Manufacturing Facility, an industrial manufacturing cooperative in the Isogo district of Okamura, Yokohama. With the combined efforts, technical expertise and financial support of a number of people, Okamura has offered high-quality products and space concepts that consistently meet the needs of customers, underpinned by the timeless philosophy, "Quality pays for itself." Okamura has enabled its customers to experience a genuine sense of opulence through its products.

Okamura constantly reinforces its integrated business structure, from development to manufacturing and sales. At the same time, Okamura recognizes advances in information technology (IT), internationalization and specialization as key guiding concepts in corporate management efforts to make further improvements in both business development and corporate value.

Amid a constantly changing businesses environment, Okamura is promoting the development of new products and solutions business to meet diverse work styles. Overseas, we are proactively conducting technical and sales tie-ups with foreign companies while pursuing the development of facilities overseas in order to gain recognition for our brand in the global market.

In addition, Okamura is working to reduce its environmental burden through business activities that are in accord with essence of its founding spirit while strengthening compliance management and corporate governance. Through these actions, Okamura is fulfilling its corporate social responsibility (CSR).

As a solutions company that creates comfortable spaces, Okamura continues to take up the challenge of fashioning new innovations. To this end, we aim to be a company that is trusted and valued by society through the ceaseless provision of optimal environments for people and communities.

We would appreciate your continued support and understanding of these efforts.

Kikuo Nakamura, Chairman

Highlights of the Year 2012–2013

2012

Jul.

10th OKAMURA Design Space R "Flow-er" Held

The OKAMURA Design Space R "Flow-er" was held at the Garden Court Showroom from July 24 to August 10, 2012. In its 10th year, the event featured guest architect Akihisa Hirata and flower artist Yuuichi Tsukada, in collaboration with whom the event was staged. The event explored a near future of architecture and landscape that use water and plants in a man-made office space.

Oct.

Exhibition at ORGATEC 2012

Okamura participated in ORGATEC 2012, Europe's largest office furniture exhibition, held in Koelnmesse, Germany, from October 23 to 27, 2012. The Company introduced its new office seating *Sabrina*, a collaboration with renowned industrial design studio Giugiaro Design. The display centered on this and other products, including *Contessa*, *OKAMURA CP*, and *Luce*, promoting the Okamura brand to the world.

Nov.

Okamura Grand Fair 2012 Held

The Okamura Grand Fair 2012 was held at the Garden Court Showroom from November 11 to 9, 2012. With the theme of "Copresence Work—New Workplace for Social Networking Age," the fair presented both items and workplace concepts aimed at helping to maximize the individual traits and abilities of each worker. Okamura also promoted new products, including displays specifically aimed at the public facility, healthcare facility and laboratory facility markets.

Okamura Grand Concert 2012 Held

For its 2012 annual concert, Okamura presented "Saori Yuki—The Voice That Enchanted the World" with special guest Kazumi Watanabe. Held at the Tokyo Metropolitan Theatre in Toshima-ku, Tokyo, on November 29 and 30, 2012, the event welcomed loyal Okamura customers to enjoy jazz standards and other famous pieces.

Feb.

Exhibition at the 2013 Supermarket Trade Show

Okamura displayed energy-saving products, labor-saving furnishings and furnishings for stores in urban areas at the 2013 Supermarket Trade Show, held at Tokyo Big Sight from February 13 to 15, 2013. With "Adapting to change, changing sales floors" as its motto, Okamura promoted comprehensive solutions ranging from product displays to environmental considerations.

Mar.

Office Seating *Sabrina* Received universal design award 2013

Sponsored by universal design Germany, this internationally renowned award is given to honor excellent universal products and services. universal design Germany offers two types of awards, the universal design award, which is based on the evaluations of such specialists and designers and architects, and the universal design consumer favorite award, which is based on consumer evaluations. This year, *Sabrina* received the universal design award 2013, based on specialist evaluations.

Exhibition at 42nd Annual Shop Fitting Show JAPAN SHOP 2013

Okamura participated in JAPAN SHOP 2013, the 42nd annual shop fitting show, held at Tokyo Big Sight from March 5 to 8, 2013. Okamura presented the *Visplay* furnishing system and display furnishings for apparel and variety stores in addition to introducing a wide variety of solutions to respond to store layout-related needs, from product displays to environmental considerations to the construction of the store itself.

Apr.

Delivery of Theater Seats for Kabuki-za Theater

Okamura delivered theater seats for the Kabuki-za Theater, which opened April 2, 2013. The seats are made with slim mesh backs, allowing for wider aisles in front of and behind seats. Without changing the overall impression of the theater as seen from the stage, Okamura sought to improve all aspects of the seating, making the seats durable and comfortable.

May

Okamura Management Seminar "Invitational Lecture Conference" Held Featuring Susan Cain

Okamura held a lecture conference at the Palace Hotel in Chiyoda-ku, Tokyo on May 16, 2013, featuring as its invited guest Susan Cain, author of U.S. bestseller *Quiet: The Power of Introverts in a World That Can't Stop Talking*. The seminar welcomed a great number of guests to Ms. Cain's discussion of the necessary and powerful role that the introverted will play in the survival of organizations into the future.

Okamura Concert 2013 in Osaka,

The Okamura Concert 2013 in Osaka, "Shinobu Sato ~Songs of Japan, the Trembling Heart~" was held at Sankei Hall Breeze, Osaka, on May 31, 2013. Welcoming a great number of loyal Okamura customers, the event featured a performance by opera singer Shinobu Sato.

Jun.

Exhibition at NeoCon 2013

Okamura exhibited at NeoCon 2013, which was held in Chicago, U.S.A., from June 10 to 12, 2013, and is the largest office furniture trade show in the world. Okamura displayed various products, including its new office seating *Choral* and the new *Cruise* type C workstation, attracting a great number of visitors.

Jul.

CSR Report 2013 Published

Okamura published its CSR report 2013 with the purpose of informing stakeholders about the Group's activities in the area of corporate social responsibility (CSR). With the themes "Contributing to Healthy Forest Development through the Use of Regional Wood," "Products and Systems That Support the Eco-Store" and "Protecting Valuable Cultural Resources," each page systematically reports the Company's activities under the Okamura Group CSR policy.

Outline of Business

1. Office Furniture

From general offices, reception areas and conference rooms to areas for relaxation, Okamura creates attractive spaces.

2. Public Facilities

From schools and libraries to community centers, theaters and museums, Okamura offers quality products and fixtures to fill the spaces in which people interact.

3. Healthcare Facilities

Proposing optimal solutions, Okamura supports the creation of medical care environments that are comfortable and meet the needs of all users.

4. Laboratory Facilities

By creating both spaces that enable researchers to concentrate on their work and spaces that foster communications between researchers, Okamura offers facilities that nurture high intellectual productivity.

5. Security Systems

For financial institutions, offices, logistic systems and retail spaces, Okamura provides systems that ensure safety and protect property.

6. Telecommunication Systems

Combining information technology with functional, attractive office design, Okamura provides solutions for today's multimedia offices.

7. Architectural Products

Safe, soundproof and flame resistant, Okamura's partitions provide the flexibility to easily change floor layouts to meet a diverse range of architectural requirements.

8. Home Interior & SOHO-Related Products

Okamura creates interior products for all ages to enjoy comfortable study and SOHO environments in the networking age.

9. Store Displays

With a full product lineup and abundant know-how, Okamura offers total coordinated store development, crafting retail spaces with an emphasis on sensibility.

10. Material Handling Systems

Through mechatronics and computer control technologies, Okamura provides total material handling support that saves space, reduces labor and boosts speed.

11. Industrial Machinery

Developed through independent research, Okamura's products are used in industrial vehicles, material handling machines and construction equipment, with recognized results in a wide range of fields.

a.

Office Furniture

MAIN PRODUCTS

- Desk systems
- Office seating
- Low partitions
- Storage systems
- Filing supplies
- High-quality wood furniture
- Reception/Meeting room furniture
- Amenity space furniture

Copresence Workplace > Workplace needs are becoming increasingly diversified, reflecting the rapid development of information technology. With this, work styles will grow more dynamic as social shifts make it possible for people to adopt varied approaches to work free of old constraints. Okamura proposes the “Copresence Workplace,” a concept that more than ever before allows people to share a common workplace that nurtures a sense of camaraderie.

Design & Solutions

Okamura approaches product design from the three perspectives of quality design, offering products of true value to customers; universal design, creating products and spaces with a genuine sense of affluence for all users; and eco-design, reducing the environmental burden of products throughout their life cycles. The Company's products have been recognized with numerous awards.

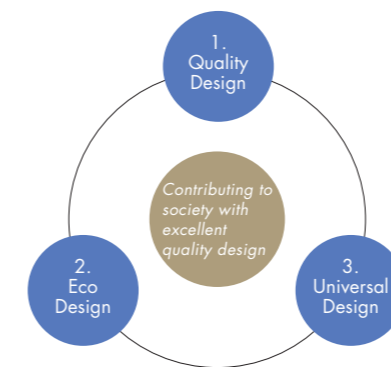

Product Design

Contributing to Society through High-Quality Design > Okamura's meticulous manufacturing enables people to enjoy opulent surroundings so that a better environment can be passed on to the next generation. We aim for high-quality design and, through our products, we create appealing environments for a variety of workplaces.

Design Policy

Our design policy is to realize the three concepts of quality design—namely the pursuit of the ideal form and designs that enable customers to feel value; the promotion of eco-designs consistent with the “three Rs” of reduce, reuse and recycle for products that carry a low environmental burden throughout their life cycles; and universal design for the creation of products and spaces that people can use comfortably.

I. Quality Design

To provide customers with products of true value, Okamura is committed to the pursuit of ideal forms and the realization of quality design. We pursue ergonomics-based product development to maximize the safety, productivity and creativity of our customers through product functionality.

Sabrina office seating

Sabrina is characterized by the flexible comfort provided by the newly developed ring structure of its backrest and by its easy-to-use adjustment controls. The frame of the backrest is configured with a center column that provides sturdy support to the body and branches extending to the left and right that are flexible, bending to accommodate changes in posture and provide stable support, for a new level of soft seating comfort. *Sabrina* also employs “smart operation” technology that makes the chair easy to adjust to suit various physiques and working styles.

Collaboration with International Designers

Okamura's extensive collaboration with designers around the world has generated a wide variety of products. The ergonomic mesh chair *Contessa*, developed in collaboration with the well-known industrial design studio Giugiaro Design, has been highly praised around the world for its design and features since its release in 2002. In 2004, Okamura released the *Baron* lineup of ergonomic mesh chairs, followed by *Luce* ergonomic multi-purpose seating in 2010 and *Sabrina* office seating in 2012.

2. Eco-Design

Promoting the “three Rs” (reduce, reuse and recycle), Okamura carries out assessments at the planning, design and layout stages for all products with the aim of developing products that have lower environmental burdens.

GREENGUARD Indoor Air Quality Certified® is an environmental standard in the United States prescribed for office furniture and other indoor construction materials. Its objective is to raise the level of public health and quality of life through programs that improve indoor air.

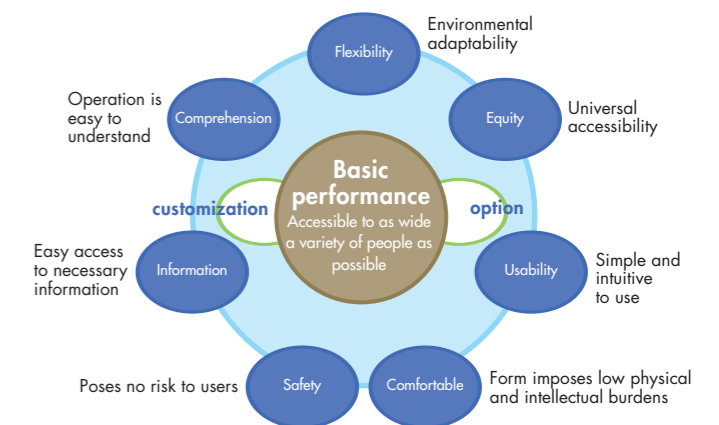

CERTIFIED PRODUCTS INCLUDE:

- Ergonomic mesh chair *Contessa*
- Ergonomic mesh chair *Baron*/OKAMURA CP
- New Concept seating *Leopard*
- Ergonomic multi-purpose seating *Luce*
- Office seating *Visconte*
- Office seating *ESCUDO*
- Office seating *Zephyr*
- Meeting chair *Grata*
- Meeting chair *Zart*
- Intelligent personal workstation *Cruise*
- Office seating *Duke*/OKAMURA CZ
- Office seating *Luxos*
- Office seating *Choral*

3. Universal Design

In its product development, Okamura constantly works toward realizing a world in which everyone can feel comfortable and prosperous. Accordingly, the Company takes into account the many possible users of the products or spaces it is designing. By improving the basic performance and configurations of products and spaces, Okamura strives to ensure usability for as many people as possible. In addition, the Company adds options and customizes everything it produces so that every single user finds them accessible and comfortable to use.

Okamura's Initiatives to Promote Universal Design

A participant in the International Association for Universal Design (IAUD) since its establishment, Okamura works to further popularize universal design products.

Awards & Space Planning

Leading the Industry in Awards > Okamura's meticulous manufacturing, delivers satisfying products to customers throughout the world. Together with products that are highly attractive, Okamura aims to excel in areas such as functionality, safety, durability and reliability as it pursues products that possess ideal form. Our stance toward the development of these traits is highly praised both in Japan and overseas, as evidenced by the numerous awards we have received.

Overseas Design Awards

universal design award

The universal design award is an internationally recognized award honoring excellent universal products based on such criteria as equitable and flexible usability for as many people as possible. In addition to the awards received by *Risefit II* personal table and *Carre* smart medical utility cart in 2012, *Sabrina* office seating also received a universal design award in 2013.

Ergonomics Excellence Award

Okamura's *Contessa* and *Baron/OKAMURA CP* ergonomic mesh chairs and *Leopard* new concept seating were certified by the Ergonomics Excellence Awards Board. This is the most prestigious ergonomics certification in Europe and is granted by the U.K. Furniture Industry Research Association (FIRA). Awarded based on examinations undertaken by FIRA to assess their true ergonomic properties, only products that meet strict requirements receive this certification.

Domestic Design Award

Good Design Award

Sponsored by the Japan Design Industrial Promotion Organization, the Good Design Award is Japan's only comprehensive design evaluation and commendation system. Since first receiving the award in 1962, Okamura has been honored continuously. With 487 items or facilities recognized to date, Okamura boasts the top position in the industry in terms of number of awards received.

JIDA Design Museum Selection

In 1998, the Japan Industrial Designers' Association (JIDA) began presenting a selection of items for the purpose of enhancing specific museum collections. JIDA chooses from among its museum archives items that are noteworthy exemplars of design sophistication and of particular relevance to their era.

Kids Design Award

The Kids Design Awards are sponsored by the specified non-profit organization Kids Design Association. The awards recognize and promote the spread of design that realizes the concept of "kids design," promoting the safety and security of children.

Space Planning

Office Solutions

Based on the concept of creating people-friendly environments, Okamura engages in R&D that focuses on both the hard and soft aspects of office design. At the Okamura Office Research Center, Okamura pursues basic research and develops new office systems, supporting the creation of complete office solutions. FM Solution Corporation approaches the creation of office spaces mainly from the perspective of facility management.

Copresence Workplace

Amid an environment of rapidly developing information technology, Okamura has proposed the "Copresence Workplace," a concept for an ideal style of office that will allow people to flexibly work anywhere, anytime. Under the concept of the Copresence Workplace, people can work independently while sharing a common location that nurtures a sense of camaraderie. In its Office Labo (office laboratory), Okamura is drawing on real-life experience as it works every day to find ways to better build ties among team members, connect to workers outside of teams and link remote offices. In doing so, Okamura strives to realize creative workplace styles for the future, workplaces that help balance work and private life.

Total Store Planning

From shopping centers to convenience stores, Okamura offers complete retail space planning tailored to the varied needs of different stores.

- A wealth of strategic data and information on the latest store designs
- Production of innovative store ideas in a timely manner
- Systemized design to create high-quality, next-generation retail spaces

Okamura draws on these strengths to offer a complete service ranging from surveys and planning to store openings and evaluations, working closely with customers to produce unique and effective retail environments.

a. Planning of store interior using computer graphics
b. Planning of special fixtures

Sustainable Development

Sustainable Development > Okamura makes every effort to promote sustainable growth and development for society as a whole and as a corporation, by emphasizing its relationship with all stakeholders. The Company focuses efforts on enhancing awareness of environmental management and quality management through the promotion of GREEN WAVE, its own environmental activity guidelines, and the construction of a product quality and safety assurance structure that stresses the development and production stages.

Environmental Management

Fully aware of its corporate social responsibility, Okamura contributes to the preservation of the global environment and the creation of a recycling society through technologies and activities that are friendly to the environment. GREEN WAVE is Okamura's platform for initiatives to solve environmental problems. Okamura selects which of its products display the environmentally friendly GREEN WAVE mark. In response to changing social conditions and global environmental standards, Okamura displays the GREEN WAVE Plus mark on products that promote greater environmental awareness.

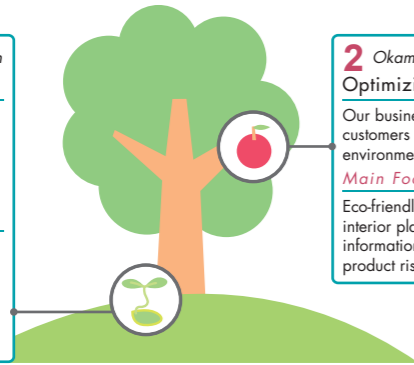

Principles and Policies

Cutting environmental burdens through green manufacturing and communication with society

Main Focus

Global warming prevention, resource saving, waste reduction, social contributions and communication with society

2 Okamura Eco-Proposal
Optimizing the yield

Our business is helping customers reduce their environmental burdens

Main Focus

Eco-friendly products and interior planning, product information disclosure, product risk management

Criteria for Selecting GREEN WAVE Products:

- Resource saving:** Manufacturing products using the fewest possible materials to reduce product weight and maximize the efficient use of limited resources and, with regard to wood, procuring materials from under-used resources or sustainable forests.
- Recycling:** Promoting material recycling by designing products that can be easily disassembled into component parts and by indicating the materials used whenever possible
- Long life:** Creating products with components that can be easily replaced as needed using simple tools and following the manual provided, as well as utilizing materials and structures that require simple and easy maintenance
- Recycled materials:** Making proactive use of recycled materials for efficient resource utilization
- Reuse:** Manufacturing products that recycle used parts
- Safety and environment:** Creating products in which the use of hazardous chemical substances is controlled and reduced and that produce less noise when in use
- Energy saving:** Creating products that feature reduced energy consumption when in use

KES Environmental Management System

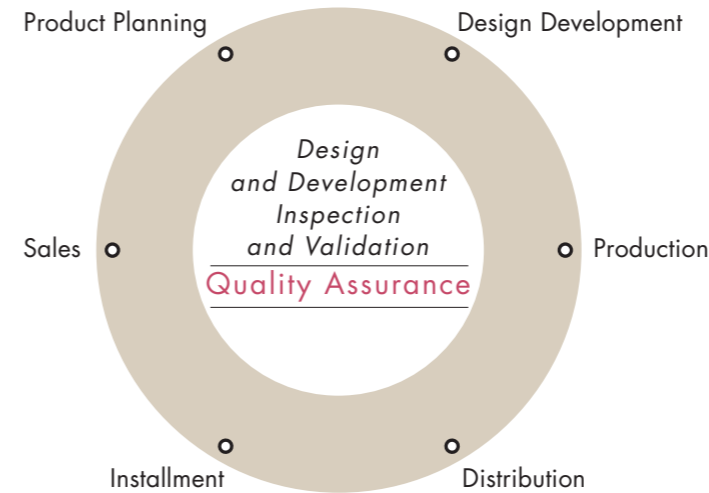

Standard Certified:
 Seeder Co., Ltd.: KES2-7-0011

Okamura introduces a host of environmental activities in its CSR Report 2013.

Quality Management

High Quality and Reliable Service > Okamura is building a quality assurance structure integrating processes ranging from manufacturing to sales, distribution and maintenance inspections. All of our production bases in Japan and overseas have registered for ISO 9001 inspection. We engage in thorough product quality management with continuous efforts to maintain and improve quality. Moreover, at the development stage for new products, we assemble managers from design, marketing, production, assembly, distribution and quality assurance to inspect product designs. Only those products that pass JIS standards, industry standards and our even more stringent internal standards are candidates for production.

At all of its ISO 9001-certified production bases, Okamura conducts quality assurance activities in accordance with a quality management system of international standard. Supporting these efforts, Okamura works to assure the development of reliable products by strictly examining safety and quality through design reviews at the development and design phase.

ISO 9001 Certified Plants and Offices:

- Fuji Seiko Honsha Co., Ltd.: KHK 98QR 094
- Siam Okamura Steel Co. Ltd.: 24111011007

Product Safety

Design Review

At each stage of product development, persons in charge of design, marketing, production, distribution, installment and quality assurance gather to review the product planning. Okamura confirms the quality and safety of products in accordance with JIS standards and industry standards as well as even stricter in-house standards.

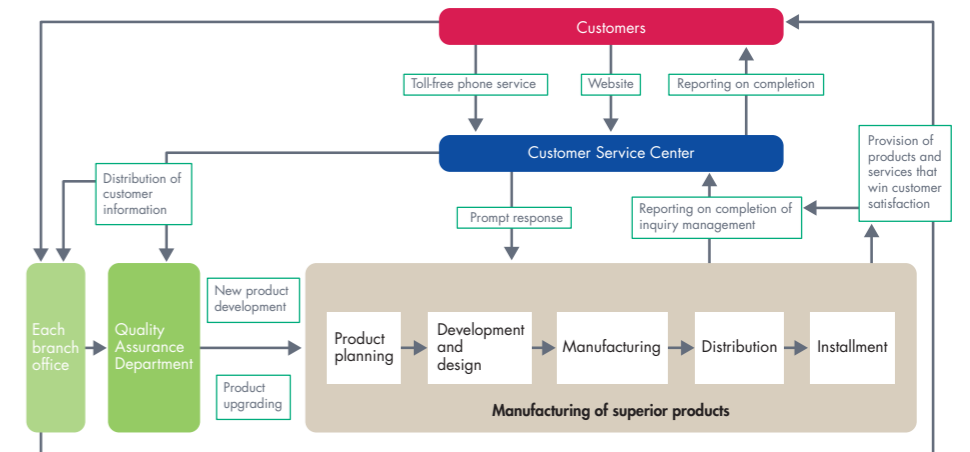

Information Provision for Safe Product Use

In order to ensure safety, where user caution is necessary, Okamura products display appropriate warning labels on a prominent spot.

Okamura Quality Assurance System

With the aim of enhancing the quality of products and services, Okamura set up the Customer Service Center. Okamura provides detailed answers to inquiries received by the Customer Service Center while promptly and accurately responding to requests and complaints, if any, by contacting the relevant branch office. Classifying the information thus gathered by category, the Customer Service Center works in tandem with the Quality Assurance Department to reflect this data in future product development, thereby preventing the recurrence of complaints. The Quality Assurance Department is involved in development from the planning phase in order to ensure the quality and safety of products at the stage of design review. Together with this, the Quality Assurance Department supervises and gives detailed instruction regarding the expressions to be used in product manuals and customer catalogues based on the ISO 9001 quality management system.

Showrooms & Museum

Greeting Clients with Comfort and Convenience >

Okamura showrooms around Japan reflect Okamura's pursuit of functionality and comfort in offices as well as other public spaces and provide an environment that is expressive of the Company's newly developed products and concepts. Surrounded by a lush garden in the Akasaka district of Tokyo, Okamura's Garden Court Showroom is located in the Hotel New Otani and boasts approximately 4,400m² of showroom space. As a place for promptly and expertly introducing Okamura products with our presentation abilities and know-how, our showrooms represent Okamura's new brand name through proposals for creating comfortable environments from a variety of perspectives.

Moreover, the Okamura Museum, located in Tokyo's Chiyoda Ward, showcases—with a specific focus on office seating—the evolution of chairs, the technologies derived from research into ergonomics that underlie their creation and much more, making this a place where visitors can learn firsthand everything they want to know about chairs.

GARDEN COURT SHOWROOM
Location: Hotel New Otani, 3rd Floor, Garden Court, 4-1, Kioi-cho, Chiyoda-ku, Tokyo, Japan
Telephone: +81-3-5276-2001

Global Network

Okamura's products are made at factories both in Japan and overseas and delivered throughout the world by means of an integrated distribution network. We are constantly striving to improve quality and service through technical and marketing collaboration with overseas companies and close cooperation between Okamura and its domestic affiliates.

Overseas Offices & Companies

Okamura has taken a broad-based approach to address diversified needs in recent years by forming technical and sales tie-ups with prominent overseas companies, aggressively pursuing the joint development of hardware and software, and developing products and systems that accurately meet current needs. While pursuing continued internationalization, Okamura will work to further bolster its brand strength through collaboration with leading foreign companies.

Production Facilities & Logistics

Building a Unique Production System > Production facilities that create products conforming to and exceeding international standards is the structure supporting the Okamura philosophy that "Quality pays for itself." The heart of these facilities is the Okamura Production System (OPS), a unique system that combines a flexible and adaptive workforce with a production line that can be easily shifted to the products that are currently in demand. An integrated management system that controls product flow from production and distribution through sales and follow-up service has also added to the solid reputation and trust given to Okamura products.

OPPAMA PLANT
(ISO 9001/ISO 14001 Certifications)
Location: Yokosuka, Kanagawa Prefecture
